

## **1. Position: Oracle ERP Consultant (2)**

ERP consultants deploy and maintain enterprise resource planning (ERP) software for clients. They determine clients' business needs, develop customized ERP solutions, and smoothly integrate ERP applications with existing infrastructure.

### **Oracle ERP Consultant Responsibilities**

- Determining ERP needs via consultation, business process analysis, and observations.
- Evaluating existing IT infrastructure and recommending system improvements.
- Developing and configuring customized ERP solutions.
- Writing programs and scripts to design user-friendly interfaces and optimized functionalities.
- Deploying ERP solutions and ensuring seamless system integration.
- Running diagnostic tests and resolving issues to enhance performance.
- Providing ERP end-user training and technical support.
- Documenting ERP processes and preparing deployment progress updates.

### **Job Requirements**

- Bachelor's degree in computer science, information technology, or similar preferred.
- Specialization in business administration or a related field will be advantageous.
- ERP certification, such as Dynamics 3654, ERP Business Process Integration or Oracle's SaaS ERP.
- A minimum of 4 years' experience as an ERP consultant in a similar industry.
- Extensive knowledge of business processes, ERP development tools, and coding languages.
- Exceptional interpersonal, collaboration, and communication skills.
- Superb problem-solving and analytical abilities.
- Excellent time management and organizational skills.
