

2. Position: Dynamics 365 Developer (4)

As a Dynamics 365 Developer, you will be responsible for designing and developing customized solutions within the Dynamics 365 platform. This includes coding, unit testing, building applications, and creating, modifying and troubleshooting existing applications.

Dynamics 365 Developer Responsibilities:

- Configuring, developing, and supporting Dynamics 365 in line with best practices.
- Creating, modifying, and troubleshooting existing applications
- Integration existing applications with Dynamics 365.
- Testing solutions.

Job Requirements:

- Microsoft certified in Dynamics 365.
- Enterprise integration expert
- Proficient in related technologies such as Microsoft Stack, Office 365, SSRS, SSIS, SharePoint, Microsoft Azure and Power BI.
- A Bachelor's Degree in Computer Science.

Salary

One of the biggest factors that can influence your salary is your level of experience. In general, the more years you spend working as a data analyst, the more you can expect to earn.
