Job Requirement
AX Dynamics 365 Consultant

Job Description:

As an AX Dynamics 365 Consultant, you will be responsible for leading the implementation and customization of Microsoft Dynamics 365 AX solutions for our clients. You will work closely with clients to understand their business requirements, design tailored solutions, and oversee the entire implementation process from start to finish.

Key Responsibilities:

1. Gather and analyze client requirements to design customized solutions using Microsoft Dynamics 365 AX.
2. Configure and customize Dynamics 365 AX to meet client specifications, including modules, workflows, security roles, and integrations.
3. Develop customizations and extensions using X++, .NET, and other relevant technologies to address unique business needs.
4. Planning and executing the migration of data from legacy systems to Dynamics 365 AX, ensuring data integrity and accuracy throughout the process.
5. Conduct thorough testing of Dynamics 365 AX implementations to identify and resolve any issues or bugs.
6. Provide training and support to end-users on how to effectively use Dynamics 365 AX.
7. Collaborate with project managers, developers, and other consultants to ensure successful project delivery.
8. Document configuration, customization, and processes implemented in Dynamics 365 AX for future reference and maintenance.

Preferred Qualifications:

- 5+ years of experience in implementing and customizing Microsoft Dynamics 365 AX.
- Bachelor's degree in Computer Science, Information Technology, or related field.
- Strong understanding of Dynamics 365 AX modules, functionalities, and best practices.
- Proficiency in X++, .NET, SQL, and other relevant programming languages and technologies.
- Experience with planning and executing the migration of data from legacy systems to Dynamics 365 AX, ensuring data integrity and accuracy throughout the process.
- Excellent communication, problem-solving, and client-facing skills.
