

DATA ENGINEER

The Position

Our client is looking for a Data Engineer to support the software development team, based in Amsterdam. You will be actively involved in maintaining various production databases, but also in the design and implementation of upcoming new projects.

An active role from a data engineering point of view is also expected in the deployment of in-house built applications. While mostly for internal use, these applications may also be client facing with considerably higher data security requirements.

The near future

Innovation has always been at the heart of what the company does, from the early adoption of computer analysis and the development of their own CAD system, to the deployment of 3-D computational techniques, auralisation and visualisation tools to improve design and decision-making. The digital revolution is well underway and is impacting every aspect of their clients' businesses, as well as their own, in profound and exciting ways. The company is committed to being the digital leader in the built environment. This means embracing the opportunities that digital offers, and changing the ways they work. It means leading the change in the industry.

The Candidate

- You can identify yourself with our client's values and you want to collaborate with us in shaping a better world with iconic and innovative projects. To maintain company's high quality standards we are looking for candidates who meet the following minimum criteria:
- Bachelor's Degree or higher
- 5+ years demonstrable proficiency in two or more of the following languages: Python, Javascript, C, C++ or Java
- Experienced with Cloud Hosting and Deployment (e.g. AWS, Azure, Heroku), PaaS and SaaS
- Experienced is required using SQL type databases (SQL Server, MySQL, Postgres), additional experience in NoSQL data stores is welcome of course.
- Experience in at least one scripting language (Python, Perl, BASH, PowerShell, PHP)
- Proficient using source code control (git)
- You are passionate about our business and would like to learn more about it and share your skills
- Excellent communication skills in English

What to expect

- A job in a multicultural and informal international working environment with good and lucrative conditions, both primary and secondary:
- Employees are eligible for the Global Profit Share scheme, dependent on the firm's financial performance. Competitive performance based salary growth
- Collective health insurance at discounted rates
- At company's university you will be enabled to increase your skills and knowledge on an international top level
- Short, long or educational assignments at company's offices and projects anywhere in the world.
